

TECHNICAL DATA SHEET AR CAPS® ACID RESISTANT CAPSULES

- AR CAPS are manufactured with HPMC, HPMCP, water and colorants.
- AR CAPS[®] produced on our premises are suitable for human consumption.
- AR CAPS raw materials meet all established requirements of the USP.
- AR CAPS have uniform dimensions within the specified tolerances.
- AR CAPS are soluble in water.
- AR CAPS disintegrate NLT 60 minutes in gastric fluid simulated and NMT 60 minutes in intestinal fluid simulated.
- AR CAPS moisture content is kept between 4% and 10%
- AR CAPS visual quality is based on Military Standard 105E, using simple sampling with level III of General Inspection.
- AR CAPS have an expiration date of 2.5 years from the manufacturing date, provided they are stored and handled in their original packaging, in places with temperatures between 59°F (15°C) and 77°F (25°C), and relative humidity levels between 50% and 70%.

TABLE Nº 11: CLASIFICATION OF VISIBLE DEFECTS

Hole: Perforation on the capsule surface
Short body: Length of body is 1.5 mm shorter than the specified
Split: Pronounced fissure greater than 1.0 mm
Long body: Length of body is 1.0 mm greater than the specified length.
Rough cut: Irregular cut in a dented form or pronounced sinuosities (greater than 1 mm) on the edges of cap and body.
Short cap: Length of cap is 1.0 mm shorter than the specified length.
Punched end major: Flat dome. It compromises the shoulder of the cap or body Punched end minor: Flat dome without affection of the cap or body shoulder.
Collect pinches: pronounced nips or folds greater than 3.0 mm of length in capsules of sizes "000"-"1" and greater than 2.0 mm of length in capsules of sizes "2"-"4".

	Wrinkles: Wrinkles greater than 3 x 2 mm on the capsule ring or along the cap or body.
	String: Small threads appearing as a result of an inadequate cutting, greater than 3.0 mm of length in capsules of sizes "000"-"1" and greater than 2.0 mm of diameter in capsules "2"-"4"
	Star end: Stellated wrinkles on the dome in a slight or pronounced way greater than 4.0 mm of diameter in capsules of sizes "000"-"1" and greater than 3.0 mm of diameter in capsules "2"-"4".
••	Bubble: Air spaces considered as a minor defect when having a diameter of 1 mm or more.
	Specks: Stain or dot of a different color on the surface of the capsule.

Note: As specifications are under continuous review, be sure to contact your sales representative for the most up-to-date technical information.

The capsules are packaged in anti-static plastic bags which provide a protection barrier against moisture and corrugated cartons for the secure storage and transportation of the capsule. This packaging material allows the protection of the physic chemical and microbiological characteristics of the product provided the storage under the specified conditions of temperature and relative humidity.
